# INTRODUCTION

Dorime Radiators SARL is a duly registered company in the DRC.

*Our roots date back to 1999 when our C.E.O Doreen Aston started Citizen Radiators in Nairobi, Kenya.*

The company dealt with repair, cleaning and fabrication of radiators whereby our market share grew from a small company to a major player in this sector.

The company ventured into the Democratic Republic of Congo, Lubumbashi in 2011 as ETS Garage Dorime Radiators , its services for various companies in the mining sector grew and in 2013 the company status was changed to Dorime Radiators SARL.

The company has grown over a period of 20 years tremendously developing technical expertise and product knowledge on servicing different types of cooler, compressors and radiators.

# VISION & MISSION

## VISION

*Provide complex Heat Transfer and Mechanical Contracting Solutions with a competent technical, management and marketing team.*

Deliver professional services by collaborating with local and global partners. Focus on owning niche markets and dominating after markets , engineering the best cooling solution ,making customers business our concern.

## MISSION

To become an industry leader in fabrication and maintenance of heat transfer equipment with consistent quality and credibility in our services in Africa.

# ABOUT US

Dorime Radiators has been operational in DR Congo market since 2011.

*We are specialists in all types of mechanical contracting, fabrication and maintenance jobs for heat transfer equipment.*

Our competitive advantage lies in Service Customization and Competitive Price Structure. Each job we execute follows a series of steps starting from careful examination of the service requirement, estimation, quotation and delivery. We rely on stringent Quality Procedures to ensure Reliable Service Delivery.

Our consistency of Work Quality, material inspection, at-door service, experienced technical team and quality compliances has contributed to our success.

*Always Super Cool!*

*The company ethos is built around inclusion, growth and engagement of our stakeholders. We take pride in our inclusive work culture that celebrates diversity.*

We have a full radiator and cooler workshop facility with the necessary equipment and technicians to repair mining equipment, Industrial equipment, and motor vehicle radiators . The technical team is capable of repairing the increasing type of plastic radiators.

- *Condensers & Evaporators*
- *Chillers*
- *Oil Coolers*
- *Welding buckets & Fiberglas repairs*
- *Fuel tanks repairs*

*Always Super Cool!*

## Did you know?

*“the Romans had the world’s first underground heating, known as the hypocaust. They represent the first documented use of central heating, and date to around 100BC.”*

*Jean Simon Bonnemain invented the first self-contained water-heating system, but it wasn’t used for central heating, but for hatching chicken eggs*

*The modern radiator was invented by Franz San-Gilli in the 1850s. He patented the invention, although many others had worked on it, too.*

*Radiator is a misnomer. The real term should be ‘convector’, since they don’t radiate heat, but use convection instead.*

*Works*
